

Create a Better Experience with Digital Whiteboards & Door Signs

DESIGN A WHITEBOARD FOR YOUR HOSPITAL'S SPECIFIC NEEDS

- Care Team
- Daily Schedule
- Diet Order
- Activity Level
- Medications
- Patient Preferences
- At Risk Conditions
- Expected Discharge Date
- Medical Orders (DNR)
- Additional Care Information

Digital Patient Whiteboards

Foster communication and improve the overall patient and family experience with a digital patient whiteboard.

Minimize the burden on nurses, ensuring that critical care details are always accessible and up-to-date. These boards offer real-time, automated updates directly from the patient's Electronic Medical Records (EMR), keeping everyone informed accurately and efficiently.

Avidex Digital Whiteboards are designed using plain language practices, icons for at-a-glance details, and dynamic banners to communicate important hospital messages

Adaptive brightness and time-of-day settings ensure the whiteboard is easily viewed during the day, while creating a restful environment at night.

Digital Patient Door Signs

Discrete Care Alert icons ensure staff are aware of sensitive information while protecting patient privacy.

Digital Door Signs outside the patient rooms eliminate the clutter of paper signage and automatically update to inform visitors and staff of isolation precautions, fall risk, NPO and more.
